Our Commitment to Clean

As we welcome you back, we want you to know that we have taken actions so that our protocols keep you safe and exceed those protocols outlined by our Chief Medical Officer.

We have taken the following actions to continue our drive to be the cleanest and safest hotel in our Province:

Public Spaces

We have doubled down on our cleaning protocols. Public spaces and high-traffic areas are wiped down constantly each day with disinfectant.

Hand Sanitizer and Face Masks

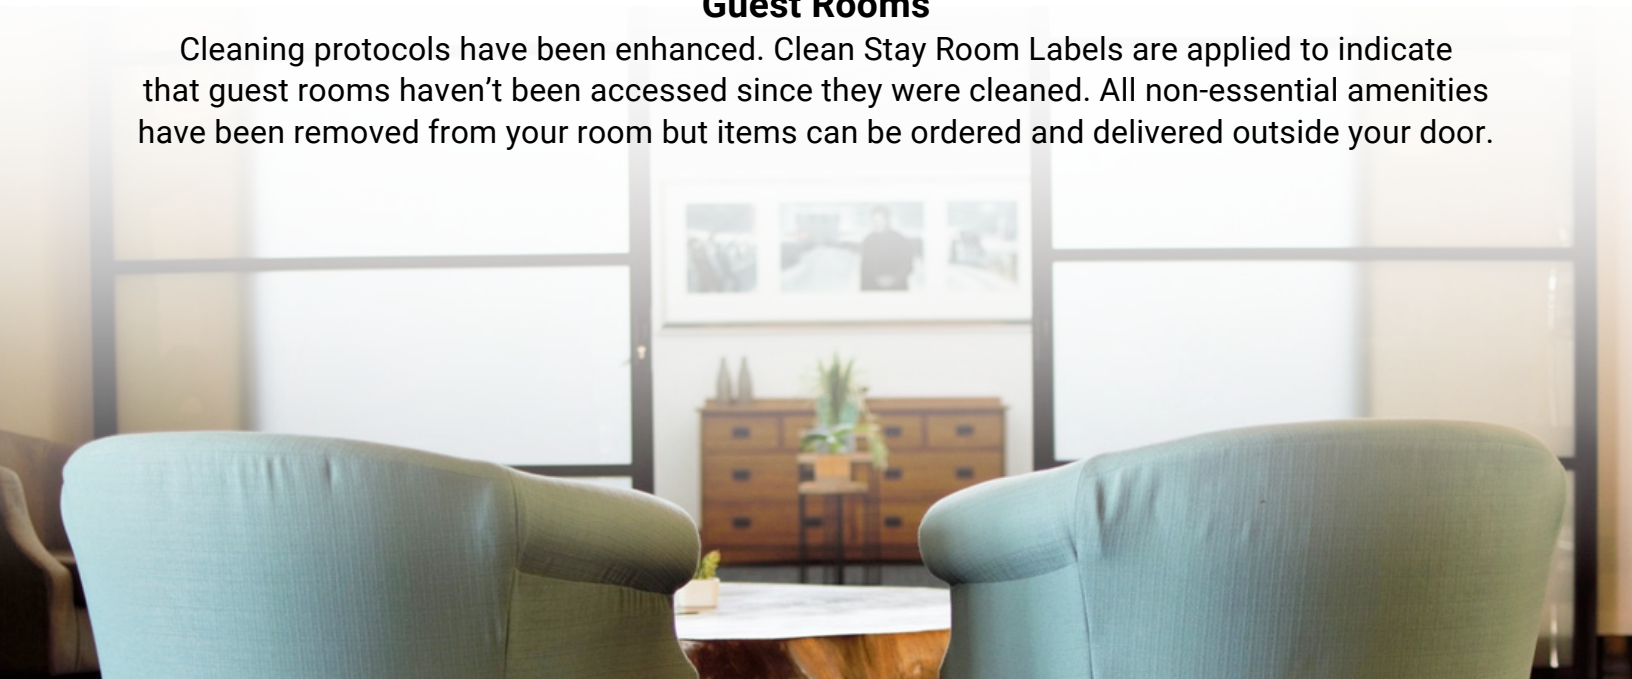

Face masks are mandatory in all public spaces including lobby, hallways, restaurant, meeting rooms, etc. Hand sanitizing stations have been installed throughout the building. Face Masks are available at our front desk for guests.

Physical Distancing

Plexiglas shields have been installed in our front desk and dining room areas. Physical distancing markers have been placed on the floor around the front desk and dining room counters. Contactless check-out available.

Guest Rooms

Cleaning protocols have been enhanced. Clean Stay Room Labels are applied to indicate that guest rooms haven't been accessed since they were cleaned. All non-essential amenities have been removed from your room but items can be ordered and delivered outside your door.

Restaurant

In-room dining is now available. We have also converted one of our meeting rooms into a dining area so that we increase our table spacing to 6 feet between each table.

Meeting Facilities

We can host large and small meetings but have adjusted our meeting room capacities to allow for physical distancing protocols. We have also installed hand sanitation stations by meeting room entrances.

Our business is about serving people at their pleasure. While ensuring we have the cleanest and safest property possible and facilitating tourism for the good of all.

That is and will remain our passion.

Sincerely,

Clareville Inn Management
